Course Loads: Rigorous course loads (15+ credits) including 2 or more science courses per semester is recommended for most professions. Everyone has a different path. Your tracking, major, and college requirements take priority, so your plan may look different than your peers.

*It is not recommended to use your summers to "knock out" or "spread out" your science courses.

Other courses may be required by specific programs. You are responsible for knowing the requirements of the schools where you plan to apply.

Many professional schools do not accept prerequisite courses taken online or at non-U.S. institutions. It is up to you to double-check whether courses taken online will be accepted.

Policies on AP, IB, AICE, and community college credit vary by school. Be sure to check each schools' policy.
